(54) HOUSEHOLD ECONOMY MANAGEMENT SUPPORT SYSTEM

(57)Abstract:

PROBLEM TO BE SOLVED: To reduce the manual input burden of a user by reading the transaction data out of a communication network and a portable storage medium.

SOLUTION: An information processor 1 is used by a household economy manager in a household and provided with a display device 101 which shows the data generated based on the transaction data, an input device 102 which inputs a display method indicating instruction via a keyboard and a mouse, a communication device 103 which electrically receives the transaction data from an information processor 2 having a means to electrically transmit the transaction data via a communication network 3, a reading device 104 which reads the data stored in a portable storage medium, a storage means 105, and a controller 106 which controls the devices 101 to 105. Then the transaction data are read out of the network 3 and the portable storage medium. An expense item corresponding table and an account means corresponding table which are defined by a user are added to the storage 105, and the conversion of transaction data is carried out.
